PROFESSIONAL SUMMARY

Principal / Staff Frontend Engineer | High-impact Frontend Architect with 18+ years of experience engineering high-scale React/TypeScript architectures, global enterprise platforms, and complex payment systems. Proven track record of translating business strategy into production-ready code, accelerating development velocity, and optimizing high-traffic systems (serving millions of users). A hands-on leader specializing in performance optimization, type-safe state management, and modern frontend infrastructure.

CORE SKILLS

Frontend Architecture	React (18/19), TypeScript (Advanced/Type-Safe Design), JavaScript (ES6+), GraphQL, Micro-Frontends
State & Data Fetching	Redux/Redux Toolkit, Zustand, Apollo Client, REST APIs, TanStack Query
Styling & UI Systems	Tailwind CSS, Styled Components, Storybook , Design System Architecture
E-Commerce & Payments	Stripe, PayPal, Apple Pay, Google Pay, Adobe Commerce / Payment Services
Backend & Infrastructure	Node.js, PostgreSQL, AWS, OpenSearch, CI/CD Pipelines, Monorepo Tooling (Nx/Turbo)
Engineering Leadership	Tech Roadmap Ownership, Cross-Functional Collaboration , Mentor-Driven Code Reviews

PROFESSIONAL EXPERIENCE

Team One / Publicis Groupe

Principal Frontend Engineer — Remote | Oct 2024 – Dec 2025

- Architected scalable React + TypeScript applications integrated into Adobe Experience Manager (AEM) to drive and manage 400+ distinct multi-tenant dealership websites from a single, unified codebase.

- Engineered robust checkout and payment systems by seamlessly pairing Adobe Commerce with providers like Stripe, PayPal, and Apple/Google Pay, optimizing transaction flows across hundreds of enterprise storefronts.
- Mentored a team of engineers through technical RFC reviews, deep-dive debugging sessions, and frontend architecture best practices.

Independent Frontend Consultant

Frontend Architecture Contractor — Remote | Oct 2023 – Sep 2024

- Provided specialized frontend architectural consulting for clients, focusing on migrating legacy systems to type-safe React and TypeScript codebases.
- Audited client applications for performance bottlenecks, optimizing core web vitals, bundle sizes, and state management architecture.
- Evaluated and prototyped modern frontend tooling setups (such as Vite, Next.js, and Monorepos) to accelerate engineering team velocity.

Cobalt

Senior UI Engineer — Remote | Aug 2021 – Jun 2023

- Architected and transitioned Cobalt's frontend ecosystem to a monorepo strategy, successfully decoupling tight deployment dependencies and accelerating independent team release cycles.
- Designed and executed a centralized Redux state management architecture across the monorepo, eliminating 60% of redundant legacy boilerplate and resolving complex asynchronous race conditions in data-heavy operational UIs.
- Collaborated closely with product and design teams to simplify complex workflows.

Yahoo / Verizon Media

Senior Software Engineer — Sunnyvale, CA | Jan 2015 – Jun 2019

- Developed frontend systems for Yahoo Mail, Yahoo Homepage, and Maktoob Sports serving millions of users.
- Built Bi-Directional localization tooling enabling right-to-left language support.
- Improved frontend reliability and performance across high-traffic consumer applications.
- Contributed to large-scale feed aggregation systems integrating 100+ data sources.

Early Career Experience

Frontend & Web Software Engineer — 2005 – 2015

- Built enterprise and consumer-facing web applications focused on frontend engineering and interactive user experiences.

EDUCATION

Bachelor's Degree in Computer Information Systems / Information Technology
Hashemite University — Jordan
